

MAKUENI COUNTY EMBRACES TECHNOLOGY TO ENHANCE ACCOUNTABILITY IN THE HEALTH SECTOR

The County Government of Makueni has linked the health department with the Kenya Medical Supplies Authority (KEMSA) Logistic Management Information System to enhance accountability of health products delivered to the County. With the Electronic Proof of Delivery App, the County will be able to acknowledge and receive receipts of health products delivered through the application. The application system has both GPS and features that monitor order turnaround time which helps to avert delays in delivery caused by stock-out of products. The procurement

department in the County has had challenges accounting for commodities purchased and delivered in the health facilities hence the adoption of technology to track orders. The Kenya Medical Supplies Authority, E-POD mobile based App gives a prompt notification when the delivery vehicle arrives at the set GPS of the health facility. Adoption of technology will help the County manage resources allocated to health sector and avoid losing equipment, medicines and other health-based supplies.
