## PREFACE

It is with great pleasure that we present to you the Kisumu County Statistical Abstract (CSA) 2024, the second edition following our initial publication in 2015. This comprehensive document represents a significant milestone in our journey toward evidence-based governance and policy formulation in Kisumu County.

The nine-year interval between our first publication and this current edition reflects the considerable challenges we have faced in building robust statistical systems at the county level. Despite these challenges, I am proud that Kisumu County has persevered in strengthening our data collection, analysis, and management capabilities to produce this essential resource.

This Statistical Abstract serves multiple critical functions for our county. First and foremost, it provides reliable and accurate data that forms the foundation for informed decision-making across all sectors of human development in the county. In a rapidly evolving governance landscape, the importance of timely and accurate statistics cannot be overstated. This document equips us with the evidence needed to formulate responsive policies, design effective programs, and allocate resources efficiently to address the most pressing needs of our people.

Furthermore, this Abstract serves as a vital tool for monitoring and evaluating our progress toward the goals outlined in our County Integrated Development Plan, the Annual Development Plans and Annual Budgets. By presenting comprehensive data across economic, social, environmental, and governance domains, it enables us to track our performance, identify areas requiring intervention, and recognize our successes.

For potential investors, development partners, researchers, and the general public, this document provides valuable insights into Kisumu County's development trajectory, opportunities, and challenges. It promotes transparency and accountability in our governance by making key information accessible to all stakeholders.

The production of this Statistical Abstract represents collaborative efforts between our county departments, the Kenya National Bureau of Statistics (KNBS), the United Nations Children's Fund (UNICEF) and the Kenya Institute of Public Policy Research and Analysis (KIPPRA), and various stakeholders who contributed data, expertise, and resources. We extend my sincere gratitude to everyone involved in this significant undertaking.

As we move forward, my administration remains committed to further strengthening our statistical capacity, ensuring regular updates to this important resource, and fostering a culture of data-driven decision-making across all levels of county governance.

I invite all stakeholders—citizens, civil society organizations, development partners, researchers, and the private sector—to utilize this valuable resource and join us in the pursuit of sustainable development and improved quality of life for all residents of Kisumu County.

A handwritten signature in black ink, appearing to read 'Peter Anyang' Nyong'o', is displayed on a light gray rectangular background.

**H.E. PROF. PETER ANYANG' NYONG'O, EGH  
GOVERNOR, KISUMU COUNTY**

## FOREWORD

The first principle in the United Nation’s Fundamental Principle of Official Statistics states that official statistics provide an indispensable element in the information system of a democratic society, serving the government, the economy, and the public with data about the economic, demographic, social and environmental situation. To this end, official statistics that meet the test of practical utility are to be compiled and made available on an impartial basis by official statistical agencies to honour citizens’ entitlement to public information. It is within this internationally accepted norm embedded in the Statistics Act, CAP 112 Laws of Kenya [Rev. 2022], that the 2024 Kisumu County

Statistical Abstract (CSA) was produced.

In line with its mandate of collaborating with and assisting the county governments or any other institutions in the production of official statistics in the country, the Kenya National Bureau of Statistics (KNBS) collaborated with County Government of Kisumu to produce the 2024 Kisumu County Statistical Abstract (CSA). The 2024 Kisumu County Statistical Abstract (CSA) is a single source of information that presents the official statistics produced by Ministries, Departments and Agencies (MDAs) both at the National Government and the County Government of Kisumu. This publication provides data series on various sectors of the economy at the county level for the period 2019 to 2023. The data is mostly from administrative records and sample surveys conducted within the period.

The production of the 2024 Kisumu County Statistical Abstract (CSA) has gone through all the recommended stages of producing official statistics. The statistics generated were validated by the MDAs within Kisumu County both from National and the County Government. The data were reviewed by the technical team from KNBS and County Government of Kisumu.

The 2024 Kisumu County Statistical Abstract (CSA) is categorized into an introductory chapter and five other chapters based on the classification of statistical activities undertaken by national and international statistical organizations. This classification follows the statistical subject-matter domains with five domains of: Demographic and Social Statistics; Economic Statistics; Environment; Governance Statistics; and Cross-cutting Statistics.

We welcome the readers to this publication and encourage positive critique aimed at improving the contents and quality of future publications. KNBS appreciates the collaboration that has resulted in the production of this publication which contains a comprehensive set of indicators that are useful for planning and policy formulation for Kisumu County.

A handwritten signature in black ink, appearing to read 'Macdonald George Obudho'. The signature is stylized and includes a flourish at the end.

**DR. MACDONALD GEORGE OBUDHO, EBS, MBS**  
**DIRECTOR GENERAL**  
**KENYA NATIONAL BUREAU OF STATISTICS.**

## ACKNOWLEDGEMENT

The production of the Kisumu County Statistical Abstract (CSA) 2024 represents a significant milestone in our county's journey towards evidence-based planning and policy formulation.

We acknowledge the invaluable contributions of individuals and institutions who have played various roles to make this publication possible.

Our appreciation also extends to UNICEF and Innovation Norway for their technical and financial support through the Humanitarian Innovation Programme.

The inspiration to produce the Kisumu County Statistical Abstract (CSA) 2024 came from His Excellency the Governor, after he clearly identified the glaring gap in the statistical capacity of the county government that has constrained policy-making, as well as development planning and implementation in the county. The Governor's steadfast support for this initiative demonstrates the administration's dedication to transparent, accountable, and data-driven governance.

Members of the County Executive Committee and Chief Officers provided sectoral data for this comprehensive document. Their willingness to prioritize data collection and management within their respective departments has been instrumental in ensuring the quality and comprehensiveness of this Statistical Abstract. We acknowledge the dedicated statisticians, economists, and data management specialists across all departments who meticulously collected, verified, and analyzed the data presented in this Abstract. Their commitment to accuracy and professionalism is evident throughout this document.

The production of the Kisumu County Statistical Abstract (CSA) 2024 was led by the Economic Planning Unit at the County Treasury that provided strategic leadership to the project from inception to completion. The quality of this publication is attributed to the commitment to excellence and attention to detail by the staff in the County Planning Unit.

This product is the result of a collaborative undertaking between the County Government and the Kenya National Bureau of Statistics (KNBS). Kenya National Bureau of Statistics (KNBS) offered technical support, quality assurance and seamless coordination between county and national statistical systems that strengthened the credibility and comprehensiveness of this publication.

Our appreciation extends to our development partners whose technical and financial support facilitated capacity building, data collection, and the publication process.

Finally, we thank all stakeholders—community representatives, private sector entities, civil society organizations, and research institutions—who contributed data, insights, and feedback during the consultation processes.

As we present this Statistical Abstract to the public, we reaffirm the commitment of the County Government of Kisumu to continuously improving our statistical capacity and ensuring that future editions of this Abstract are produced regularly.

We fully understand the central role of data in development management for the welfare of the people.

Tich Tire!

## Overview of Kisumu County

Kisumu County is strategically located in western Kenya along the eastern shores of Lake Victoria, the second-largest freshwater lake in the world. The county covers a total area of approximately 2,086 square kilometres (1,960 sq km of land and 126 sq km of water). It lies between longitudes 33° 20'E and 35° 20'E and latitudes 0° 20'S and 0° 50'S.

The county's terrain varies from the lowlands along the shores of Lake Victoria to the eastern and northern uplands, creating distinct ecological zones. The altitude ranges from 1,144 meters above sea level at the lake shore to 1,525 meters in the eastern plateaus. This varied topography influences the county's climate, agricultural potential, and settlement patterns.

As shown in Figure 1, Kisumu County borders Siaya County to the west, Vihiga and Nandi Counties to the north, Kericho County to the east, and Homa Bay County to the south across the Winam Gulf. The county's strategic location on Lake Victoria has historically established it as an important port city and commercial hub for the entire Lake Victoria Basin.

**Figure 1: Location of Kisumu County in Kenya**

Source: Kenya National Bureau of Statistics (KNBS)

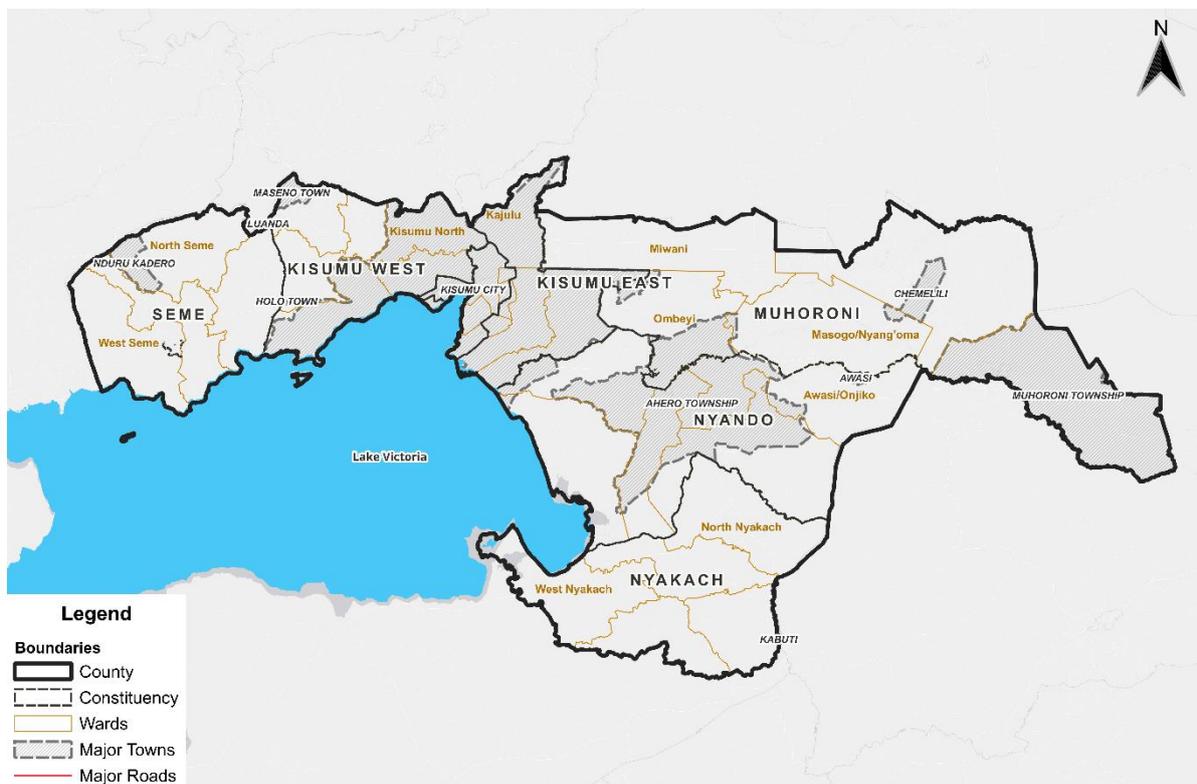

According to the 2019 Kenya Population and Housing Census, Kisumu County has a population of approximately 1,155,574 people, with 560,942 males, 594,609 females, and 23 intersex persons. The county has experienced steady population growth, with current estimates projecting a population exceeding 1.2 million.

The Luo community constitutes the predominant ethnic group in Kisumu County, making up approximately 90% of the population. The Luo people are traditionally fisher-folk and agriculturalists who have inhabited the Lake Victoria Basin for centuries. Their rich cultural heritage is evident in their language (Dholuo), music, dance, oral traditions, and social organization.

Kisumu County is divided into seven constituencies, which serve as the primary political units represented in the National Assembly by Members of Parliament (MPs). Each constituency is further subdivided into wards, which form the political units represented in the County Assembly by Members of the County Assembly (MCAs).

Figure 2 shows the respective political units of Kisumu County.

## 2. Domain 2: Economic Statistics

### 2.1. Macroeconomic Accounts and Statistics

This subdomain covers the compilation of macroeconomic accounts and macroeconomic statistics. It includes institutional sectors and industries. This category includes the aggregation, consolidation and reconciliation of the different components of economic statistics.

**Table 2.1.1: Gross County Product (GCP) by Economic Activities at Current Prices, 2019-2023**

Economic Activities	Prices, KSh. (000)				
	2019	2020	2021	2022	2023
Agriculture, Forestry and Fishing	38,614	41,501	39,205	49,528	52,525
Mining and Quarrying	1,769	1,932	2,271	2,938	2,549
Manufacturing	27,391	28,647	31,288	35,694	39,534
Electricity Supply	5,120	6,851	6,574	5,775	7,620
Water Supply; Waste Collection	1,990	1,916	2,099	2,228	2,257
Construction	15,498	18,942	21,410	24,044	25,308
Wholesale and Retail Trade; Repair of Motor Vehicles	18,126	18,623	20,397	22,528	24,669
Transport and Storage	39,298	37,956	46,321	56,980	65,481
Accommodation and Food Service Activities	4,405	2,878	4,930	5,379	7,036
Information and Communication	4,272	4,593	4,837	5,293	5,650
Financial and Insurance Activities	10,232	10,741	12,978	15,027	17,649
Real Estate Activities	29,825	31,269	33,908	36,081	39,929
Professional, Technical and Support Services	5,366	4,756	5,462	5,745	6,280

### 3. Domain 3: Environmental Statistics

The breakdown in this domain follows the structure of the Framework for the Development of Environment Statistics approved by the United Nations Statistical Commission in 2013.

#### 3.1. Environment

The sub domain covers statistics about the physical, biological and chemical characteristics of the environment.

## **4. Domain 4: Governance Statistics**

### **4.1. Participation**

This subdomain covers statistics on the ways in which individuals take part in political and public affairs, including by registering to vote, voting or standing as a candidate in elections; being members of legislative, executive and judicial bodies; accessing positions in the public service; being a member of a trade union; and engaging, individually or as members of political parties and other non-governmental organizations, in political activities.

## 4.2. Access to and Quality of Justice

This subdomain covers statistics on the ability of people to defend and enforce their rights and obtain just resolution of justiciable problems, through impartial formal or informal institutions of justice and with appropriate legal support. It covers both criminal and civil justice, including the accessibility, effectiveness and quality of legal assistance, processes, decisions and outcomes.

## **5. Domain 5: Cross-Cutting Statistics**

This section deals with conceptual or data work based on thematic approaches that require bringing together data across different domains to meet the data needs for policy agendas for development. The domain also covers statistical work that spans two or more of the previous subject-matter domains, or is not elsewhere classified

### **5.1. Information Society and Digitalization**

The subdomain covers work on statistics, indicators and frameworks to monitor digital transformation and the use and impact of information and communication technologies (ICT) on society. It looks at these topics in a wider sense than economic aspects, including well-being in a digital society, including work on internet use, internet application, information and communications technology trade, computer use, broadband connectivity, e-commerce, etc.
